

**EMPLOYEE TRAINING RECORD**

**TRAINING TITLE**      Chainsaws - Handling, Transportation and Storage

**KEY TEACHING POINTS**

- Handle saw safely to prevent injury to yourself or others.
- Shut off saw motor when carrying saw for more than a short distance.
- Let saw cool before transporting.
- Use a scabbard or bar guard when transporting saw.
- Carry saw with bar to rear. Ensure scabbard is on and muffler is away from body.
- Use a carrying case to prevent damage to the saw during transit and storage. The case also provides convenient storage for the owners manual and tools.
- Secure saw and carrying case during transportation to prevent them from moving.
- Drain all fuel into an approved safety container before storing saw for long periods. Then start motor to empty fuel from the carburetor.
- Store your saw in a cool, dry place.
- Do not carry a saw on your shoulder unless the chain is properly guarded or removed.
- Do not transport a chain saw in the passenger compartment of a vehicle.

**TEST**

QUESTION	ANSWERS	
	TRUE	FALSE
