

EMPLOYEE TRAINING RECORD

TRAINING TITLE **Check the Label for Key Information**

KEY TEACHING POINTS

CHEMICAL LABELS ARE AN IMPORTANT SOURCE OF INFORMATION

- Chemical manufacturers must provide labels with their products
- Each container must have a readable label.
- Signs placards, or similar materials may be used instead of labels.
- Employees must read the label before using any chemical.

THE LABEL IDENTIFIES THE CHEMICAL HAZARDS

- Physical hazards that could develop if you don't handle the chemical properly.
- Health hazards if you are overexposed to the chemical.

A LABEL'S HAZARD WARNINGS MAY USE WORDS, PICTURES, COLORS, OR NUMBERS

LABELS MAY INCLUDE SAFETY PRECAUTIONS

ALWAYS READ THE LABEL BEFORE USING OR HANDLING A CHEMICAL.

TEST

QUESTION	ANSWERS	
	TRUE	FALSE
1 The City is responsible for telling employees about the hazards found in chemicals.		
2 Chemical container labels identify the chemical and its manufacturer.		
3 Labels may identify health hazards.		
4 Labels may include chemical protective information such as what PPE to use and what handling and storage precautions to follow.		
5 To fully understand a chemical's hazards and protections, you should read the label and then read the material safety data sheet.
