

EMPLOYEE TRAINING RECORD		
TRAINING TITLE	Sampling Techniques	
KEY TEACHING POINTS		
<p>Wear rubber gloves if your hands may come in direct contact with wastewater or sludge. When you have finished sampling, always wash the gloves thoroughly before removing them. After removing the gloves, wash you hands thoroughly, using a disinfectant-type soap. Never collect any samples with your bar hands, if you have any broken skin areas, such as cuts or scratches, you may easily become infected.</p> <p>Do not climb over or go beyond guardrails or chains when collecting samples. Use sample poles, ropes and other devices as necessary to collect samples.</p> <p>Wear full faceshields to protect your eyes, nose and mouth from contamination if your sampling technique may cause splashing.</p>		
TEST		
QUESTION	ANSWERS
